Web site MAP :

Note a side:

Holà, first of all, thank you for taking the time to correct my website.

It was my second essay, i tried to build it with only HTML and CSS. I choosed the theme of a small French bakery. I'm also familiar with the Frensh language, so some parts of my code are commented in Frensh, I did my best to comment it in English :) !

I also tried to make it as simple as possible! You can notice that there isn't a Portfolio, because it's a bakery! I'm working on my own Portfolio, i hope it won't affect my grade.

MAP:

The web site contains 3 mains pages:

- Home page: which contains a small introduction of the bakery, their history, what they propose and some of their famous recipies!
- History page: it describes and helps the costumer understand and trust the bakery!
- Contact page: Contains all the links, ways to contact the bakery and pass an order.
- Pages of the 7 most well reputed recipes of the bakery!

Thank you again for taking the time to read until this page! I look forward to your comments with enthusiasm, cordially.
